

Speedy Green

Grass mixture for sports fields and other applications

- ✓ Fast germination and fast establishment
- ✓ Suitable for restoring sports fields, parks and intensively used areas
- ✓ Excellent wear tolerance

Fast germination and fast establishment

As befits a grass seed mixture specifically intended for overseeding, Speedy Green® germinates and establishes quickly, restoring your sward to its former splendour in less than no time. In the summer months, Speedy Green® is the ideal mixture for turning a turf full of bare patches into a strong, attractive sward.

Suitable for restoring sports fields, parks and intensively used areas

Speedy Green® is ideal for sports fields, but can also be used in parks and other intensively used areas. Many managers of public green spaces now swear by Speedy Green® when they face the task of quickly creating an attractive sward in the summer months.

Excellent wear tolerance

Overseeding with Speedy Green® results in a sward with an excellent wear tolerance, making bare patches disappear while also preventing the risk of them reappearing quickly.

Speedy Green

Composition

| Quantity | Species |
|----------|----------------|
| 100% | Lolium perenne |

Specifications

| Name | Value |
|----------------------|------------------------------|
| Establishment speed | very fast |
| Nitrogen requirement | high |
| Speed of Growth | fast |
| Sowing rate | 1.5-2.5 kg/100m ² |
| Mowing height | from 20 mm |
| Packaging | 15 kg |

Characteristics

| | |
|---|--------------------------------|
| ★★★★★ Fast Establishment | ★★☆☆☆ Self-Repairing |
| ★★★☆☆ High wear tolerance | ★★☆☆☆ High wear tolerance |
| ★★★★☆☆ Germination low temperatures 6°C | ★★☆☆☆ Requires less irrigation |
| ★★☆☆☆ Requires less fertilisers | ★★☆☆☆ Requires less pesticide |
